Fund’s Performance

Scheme Returns	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Total
2024	1.10%	1.00%	1.01%	1.68%	1.08%	1.99%	1.54%	1.27%	1.41%	0.93%	1.03%	1.08%	**15.12%**
2025	1.24%	0.16%	1.30%	1.03%	1.10%	1.34%	0.43%	0.82%	1.03%	1.18%	0.81%	0.52%	**10.96%**
2026	0.70%	0.50%	0.28%	1.44%	0.84%	1.15%							**4.91%**

Break-up of the expected returns

Arbitrage Strategy: How the returns are generated

- Large orders by market participants create short-term market inefficiencies
- This leads to availability of arbitrage which the fund capitalises upon
- Our state-of-the-art tech systems take advantage of these micro dislocations

Gross returns in INR terms

Risk Management

Principle	Description
Sticking to the script	The fund deploys arbitrage strategy only which has been rigorously tested
Diversification	The fund avoids concentration risk by dealing in a large number of stock derivatives
Manage Operational Risk	Automated, technology-driven, order-placement and position management sharply reduces operational risk

Risk Factors

- The fund seeks to invest in listed securities. Market price fluctuation in these securities is likely to have direct impact on the value of Fund's investment. Portfolio investments may be volatile due to variety of inherently difficult to predict factors including but not limited to domestic or international economic and political developments
- While the fund strives for capital protection, this is not a principal protection fund. There is no assurance / guarantee of pay-outs or returns
- The portfolio vehicle may be subject to catastrophic events and other majeure events during their construction, technical and/or operational phases. Such events may include fires, floods, earthquakes, wars, riots, terrorist acts, acts of God and similar risks. These events could result in a partial or total loss of a portfolio investment, or significant down time, resulting in lost revenues, among other potential detrimental effects. While the fund seeks to utilize insurance and other risk management products (to the extent available on commercially reasonable terms) to mitigate the potential loss, this may not always be practical or feasible
- The fund would invest in derivative securities as a part of its strategy to deliver superior risk adjusted returns. Risk associated with investment in derivatives include but are not limited to:
  - Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of derivative related strategies depends upon the ability of the Investment Manager to identify such opportunities. Strategies involve uncertainty and decision of the Investment Manager might not be profitable. No assurance can be given that the Investment Manager shall be able to identify or execute such strategies
  - Derivative products require the maintenance of adequate controls to monitor the transactions and the embedded market risks that a derivative adds to the portfolio. Besides the price of underlying asset, the volatility, tenor and the interest rates affect the pricing of derivatives
- Although it will be the policy of the fund to reasonably diversify its portfolio investments, the fund may at times hold relatively few investments. The fund could be subject to significant losses if a large position declines in market value or is otherwise adversely affected, including default of the issuer
- By reason of its other activities, the fund may acquire confidential or material non-public information or be restricted from initiating transactions in certain securities. The fund will not be free to act upon such information. Due to these restrictions, the fund may not be able to initiate a transaction that it otherwise wight have initiated and may not be able to sell an investment that it otherwise might have sold
- The fund may invest in fixed income securities which would have risk of default and risk associated with changes in interest rate and/or credit spread
- At times the liquidity of the investment made by the fund might be restricted by trading volumes, settlement periods and transfer procedures
- The cash assets of the fund, including subscription amounts paid to it by beneficiaries and money awaiting distribution, will be held in band accounts selected by the Fund using appropriate care and diligence. However, the solvency of such banks is not guaranteed and upon the insolvency of such a bank all or part of the fund's money may be lost
- The value and marketability of the fund's investment may be affected by changes or developments in the legal and regulatory climate in India. SEBI / RBI / the Government of India may make changes to regulations which may affect the ability of the fund's strategies to make, or exit investments
- The past performance of the Investment Manager and its affiliates may not necessarily be indicative of the results the Investment Manager may be able to achieve with a Fund's investments

Disclaimer

- Distributors may please note that the terms and conditions for investment into the Inquant Debt Plus fund by Inquant Alternative Investment Trust may undergo changes as advised by SEBI or as necessary from business point of view.
